I am a design practitioner transitioning into UI and web design, with previous experience in project management, platform operations, and cross-functional communication in the music industry. I translate that background into information architecture, user flows, and build-ready interface design. I care about clear content hierarchy, stable component rules, and maintainable frontend implementation, using Figma for design systems and prototypes while applying Vue, Nuxt, SCSS, and RWD thinking to turn designs into usable web and app prototypes.

Selected Work

Gabor Patch

A mobile-first visual training app that turns Gabor patch recognition into onboarding, preparation, task, completion, and progress-recording flows. The project uses Canvas-based stimulus rendering and clarifies feedback states, long-term records, and daily practice rhythm.

Stratum - AI Career Advisor

An AI career decision-support product that organizes Gemini-generated content into scannable modules, helping users compare career directions, identify skill gaps, and decide next steps while handling loading, error, and response structures to reduce waiting anxiety.

Buddy House

A restaurant brand website concept that connects visual identity, design system, menu browsing, and reservation flow. Figma Variables, component states, and RWD planning help extend the brand impression into practical browsing and booking behavior.

Experience and Activities

Frontend Slicing / Frontend Partner

2025/6 - 2026/6

Hsimular Co., Ltd. Built responsive web pages with HTML5, CSS3, SCSS, Bootstrap 5, and Git / GitFlow, organizing styling rules and team handoff so design mockups could become stable and maintainable frontend screens.

Music Operations Specialist

2015/1 - 2018/9

iNDIEVOX. Managed licensed content uploads, event EDMs, banners, album visual assets, and cross-functional project coordination, building experience in digital platform operations, content management, and requirement communication.

Early Event and Content Experience

The Wall marketing planning and radio project assistant experience, covering event promotion, social media assets, audio content organization, and on-site collaboration, strengthening sensitivity to content rhythm, user context, and visual communication.

Skills

Design

Figma, Auto Layout, Components, Variables, Design System, Wireframe, Prototype, User Flow

Frontend

HTML, CSS / SCSS, Bootstrap 5, Tailwind CSS, Vue 3, Nuxt, RWD, Canvas basics

Workflow and Analytics

Git / GitHub, Vercel, Google Analytics, Microsoft Clarity, Gemini / AI-assisted workflow

Education

Shih Chien University

Information Simulation and Design | Bachelor degree
